		:	
Serial No.	10/029,365	:	Group Art Unit 1742
		:	
Application Filed	December 20, 2001	:	Examiner: Sheehan, John P.

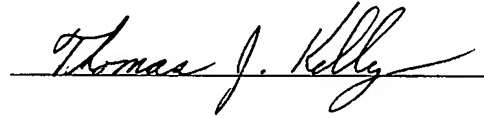

For: METHOD OF RESTORATION OF MECHANICAL PROPERTIES OF A CAST  
NICKEL-BASED SUPERALLOY FOR SERVICED AIRCRAFT  
COMPONENTS

**DECLARATION UNDER 37 CFR § 1.132**

Thomas J. Kelly, hereby certifies the following:

1. I am a joint inventor of all the claims of the patent application identified above and I am a joint inventor of the subject matter described and claimed therein.
2. I have extensive knowledge of the compositions of superalloy materials and I am familiar with trademarks of superalloy materials, as I am skilled in the art of superalloy compositions.
3. To the best of my knowledge, the trademark "Inconel 903" for a superalloy material does not exist in the art. The use of such a designation would be recognized by one skilled in the art as referring to the trademark "INCOLOY® 903," which does exist.
4. To the best of my knowledge, the trademark "Inconel 907" for a superalloy material does not exist in the art. The use of such a designation would be recognized by one skilled in the art as referring to the trademark "INCOLOY® 907," which does exist.
5. To the best of my knowledge, the trademark "Inconel 909" for a superalloy material does not exist in the art. The use of such a designation would be recognized by one skilled in the art as referring to the trademark "INCOLOY® 909," which does exist.
6. The term INCOLOY® generally is used with reference to an alloy falling in the family of iron-base superalloys.
7. The term INCONEL® generally is used with reference to an alloy falling in the family of nickel-base superalloys.

8. I have observed incorrect usages of the terms INCOLOY® and INCONEL®. Examples of such incorrect usages are available on the Internet.
9. I hereby acknowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of this application or any patent issuing thereon, and I hereby declare that all statements made in this declaration of my own knowledge are true and that all statements made on information and belief are believed to be true.

A handwritten signature in cursive script, reading "Thomas J. Kelly", is written over a horizontal line.

Thomas J. Kelly
